Kylie Linden

Experience

Project 1: Life Expectancy Data Analysis

Stats 101A: Introduction to Data Analysis and Regression

- Analyzed a dataset that contained various variables and their effect on life expectancy
- Utilized R to create a multiple linear regression model to predict life expectancy

Project 2: Cognition Data Analysis

Stats 101B: Introduction to Design and Analysis of Experiment

- Used a virtual island to conduct an experiment of effect of drugs, exercise, and food on cognition
- Performed ANOVA testing in R on the data

Project 3: Obesity Data Analysis

Stats 101C: Introduction to Statistical Models and Data Mining

- Analyzed a dataset containing various variables and whether or not a person is obese

Education

Mt. San Jacinto College - Mathematics, A.A

August 2022-June 2023

University of California, Los Angeles - Statistics and Data Science, B.S.

September 2023-September 2025

Relevant Coursework: Introduction to Data Analysis and Regression, Introduction to Design and Analysis of Experiment, Introduction to Statistical Models and Data Mining, Introduction to Statistical Programming with R
